

# CV Simon Klüttermann

I strongly suggest not reading this here, since this is just a port of my better (online) CV, which you find at <http://www.psorus.de/s/cv.html>

Explanation

1

These are the grades of my bachelor studies

2

Its not so easy to judge how good a grade actually is (a 1.3 is a lot worse, when the mean grade is 1.5 compared to a mean of 2.8)

3

To solve this, I add relative Information

4

is a grade that is at least one sigma above the mean. Assuming a gaussian grade distribution, around 16% of courses should reach this level

5

represents a grade above average (~34%)

6

and  represents a grade below average (50%)

7

Also this statistics is based on 2 exams each, of which I only participated in one

Theoretical

Introduction to theoretical physics

3.0

Mechanics

4.0

Electrodynamics

2.7

Quantum Physics

4.0

Statistical Physics

2.0

Special Relativity

passed

Math

Higher Math 1

2.7

Higher Math 2

2.7

Higher Math 3

2.3

Higher Math 4

3.7

Experimental

Mechanics

3.7

Electrodynamics

2.0

Discussion in experimental physics

3.0

[What is this?](#)

Optics

1.7

Nuclear Physics

2.7

Solid State Physics

1.7

Particle Physics

2.7

Laboratory Courses

initial Lab course 1

3.0

initial Lab course 2

3.3

Advanced Lab Course

1.7

Computational

Basic C++ Programming

1.0

Algorithms and Datastructures

2.0

Basics of data analysis

3.3
